DETAILED ACTION

Election/Restrictions

Applicant's election of Group II, claim 2, in the reply filed on October 28, 2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Consequently, claims 1 and 3-11 have been withdrawn from further consideration.

Claim Objections

Claim 2 is objected to because of the following informalities: Claim 2 recites
"Lactbacillus" an apparent typographical error of the word "Lactobacillus." Appropriate
correction is required.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 2 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 2 is directed to DNA primers comprising oligonucleotides which have the

same characteristics and utility as DNA found naturally and therefore does not constitute as patentable subject matter.

In the absence of the hand of man, naturally occurring products are considered non-statutory subject matter. <u>Diamond v. Chakrabarty</u>, 206 USPQ 193 (1980). Mere purity of naturally occurring product does not necessarily impart patentability. <u>Ex parte Siddigui</u> 156 USPQ 426 (1966). However when purity results in new utility, patentability is considered. <u>Merck Co. V. Chase Chemical Co.</u> 273 F. Supp 68 (1967). See also American <u>Wood v. Fiber Disintergrating Co.</u>, 90 US 566 (1974); <u>American Fruit Growers v. Brogdex Co.</u> 283 US 1 (1931); <u>Funk Brothers Seed Co. V. Kalo Innoculant Co.</u> 33 US 127 (1948). Filing of evidence of a new utility imparted by the increased purity of the claimed invention and amendment to the claims to recite the essential purity of the claimed products is suggested to obviate this rejection. For example, "A primer set for detecting Lactobacillus hexosus comprising an *isolated* oligonucleotide..."

Claim 2 is free of the prior art of record.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Navarro whose telephone number is (571) 272-0861.
